The Impact of SAP Success Factor Implementation on Human Resource Management: Application to Cooperative Bank of Oromia

Problem Statement

The implementation of SAP Success Factors, a cloud-based human resource management software, has become increasingly popular among organizations seeking to streamline their HR processes and improve overall efficiency. However, there is a lack of empirical research on the specific impact of SAP Success Factor implementation on human resource management practices in the banking sector, particularly in developing countries like Ethiopia. Therefore, this study aims to investigate the impact of SAP Success Factor implementation on human resource management within the Cooperative Bank of Oromia. Despite the increasing adoption of such systems by organizations globally, there remains a gap in the literature regarding their effectiveness and implications for HRM practices, particularly in the context of banking institutions in Ethiopia. Therefore, this study aims to provide a clear and concise overview of this gap in existing literature and the significance of addressing it through empirical research.

Proposed Objectives

1. To evaluate the impact of SAP Success Factor implementation on HRM practices in Cooperative Bank of Oromia.
2. To analyze the impact of SAP Success Factor implementation on recruitment and selection processes within the bank.
3. To evaluate the effectiveness of SAP Success Factor in performance management and talent development within the bank.
4. To identify any challenges or barriers encountered during the implementation of SAP Success Factor within the bank.

Research Questions

1. What is the impact of SAP Success Factor implementation on recruitment and selection processes in Cooperative Bank of Oromia?
2. What is the current state of HR management practices within Cooperative Bank of Oromia?
3. What are the specific benefits and drawbacks of SAP Success Factor implementation in recruitment and selection processes?
4. How does SAP Success Factor implementation influence performance management and employee development initiatives in the organization?
5. What are the major challenges faced during the implementation of SAP Success Factor within the bank?

Research Methods

This study will utilize a mixed-methods approach, combining quantitative and qualitative research methods. The quantitative data will be collected through surveys and questionnaires distributed to employees and HR managers within the Cooperative Bank of Oromia. This data will be used to analyze the current state of HR management practices and the impact of SAP Success Factor implementation. Qualitative data will be collected through interviews and focus group discussions to gain a deeper understanding of the implementation process and identify any challenges. Data analysis will involve statistical techniques for survey data and thematic analysis for interview transcripts. The appropriateness of this methodology is justified by its ability to address the research objectives and answer the research questions effectively.

Conclusion

This concept note outlines the preliminary framework for investigating the impact of SAP Success Factor implementation on HRM practices in Cooperative Bank of Oromia. By addressing the identified problem statement through specific research objectives and questions, and employing appropriate research methods, this study aims to contribute to the existing literature on HRM and technology integration in the banking sector. Further development and refinement of the research proposal will be guided by this concept not
